

Directions for use: Apply 2 ounces by weight per acre directly to seeds in seed box or metered. When applying in seed box, mix seeds with product to ensure complete coverage. Product does not mix with water.

Beauveria bassiana is a natural beneficial fungus derived from plants environmentally friendly to soils and rhizosphere residents. Beauveria bassiana forms natural symbiosis for the whole plant (roots, stems and leaves), forming an integrated network that works well with plant cells, other beneficial organisms, and the environment. This symbiotic partnership elevates the plant's natural ability to resist pests, pathogens, and seasonal stressors, which can reduce necessity of single chemical solutions that can harm other living residents.

Warranty: JABB of the Carolinas, Inc. guarantees this product to contain the amount of active ingredients as described in this label and that the product will be as effective as intended if properly transported, stored, and applied per label instructions. All field complaints must be brought to the attention of JABB of the Carolinas, Inc. within seventy (70) days of planting. JABB of the Carolinas, Inc. makes no other expressed or implied warranty of fitness, warranty of merchantability, or warranty of a particular purpose, or any other express or implied warranty. JABB of the Carolinas, Inc. liability of hereby expressly limited to the purchase price of this package only. In no event shall JABB of the Carolinas, Inc. or any seller of this product be liable to consequential, special, or indirect damages resulting from the use or handling of this product.

This product should not be used as a pesticide.

SPE-120 strains were selected for plant symbiosis and have been cultured from nature. Strains have not been genetically altered.

No other natural biological inoculant offers its living host compatible metabolites used throughout the plant more efficiently for health, immunity, and vigor.

## **Soil and Plant Enhancer – SPE-120 with lubricant**

Plant enhancer contains a beneficial microbial that forms an essential symbiotic relationship enhancing plants when established early in plant growth.

Active Ingredient: *Beauveria bassiana* min of  $(1 \times 10^9 \text{ cfu/g})$  1%

1 acre treatment of SPE-120 with lubricant in 2 ounces by weight of 80/20 seed lubricant (mineral talc/graphite)

NOTE: Store in a facility that is below 90°F. Keep out of direct sunlight

Produced by JABB of the Carolinas, Inc  
302 E Brown St., Pine Level, NC 27568
